

# EOS-Retro

## MACRO ACCESSORY

### EOS-RETRO

| REVERSE ADAPTER FOR CANON EOS

| STEPPING RINGS

#### TOP TIP

For extreme enlarging we recommend the use of the NOVOFLEX BALPRO 1 universal bellows together with the reversing ring for CANON EOS. This combination not only includes an automatic bellows for the CANON EOS, but also lets you use the camera lens in reverse position with full automatic control of the bellows. The image ratio of the EF 1.8/28 mm in reverse position on the BALPRO 1 ranges from 3.6- to 7.2-fold enlargement.

#### PRODUCT INFORMATION

For owners of CANON EOS wide-angle or zoom lenses, the EOS-RETRO opens up the world of extreme close-up photography with outstanding quality. The EOS-RETRO lets you mount the lens in reverse position on the camera. The ring transfers all control functions. With a CANON EOS 28-105 mm zoom lens in reverse position, you get an image ratio of 1:7 with a focal length of 105 mm from 1:7 to 2.8:1 at 28 mm. This is a wider setting range than is possible with a macro lens. The EOS-RETRO is supplied standard with a 58 mm filter diameter. Stepping rings are available for other filter sizes.

#### TECHNICAL DATA

Order code:	EOS-RETRO
Size:	75 mm (2.95")
Weight:	160 g (0.35 lbs)
Maximum extension:	550 mm (21.65")
